Summary

Software Developer and Computer Science student with a passion for building clean, maintainable, testable, and scalable code. I'm driven by a desire to make a positive impact through software.

I can assure you that my performance will be at the level of a mid-level developer. Considering that I do not have much work experience, I am willing, if necessary, to collaborate on a trial basis without payment for a period of time to prove the quality of my work.

Experience

Coffeez Jul 2025 - Present

Founder & Full-Stack Developer - Self-employed

 <https://coffeez.xyz>

Built Coffeez, a platform for creators to receive cryptocurrency donations through virtual "coffee" purchases. Coffeez is open-source and available on [GitHub](#).

Typersian May 2025 - Present

Founder & Developer - Self-employed

 <https://typersian.site>

Built Typersian, world's first system-wide app that converts Finglish (Persian in Latin script) to Persian script; along with a website for it. Typersian is open-source and available on [GitHub](#).
